

Mac: Guide to Install Android Studio

Install Android Studio

Navigate [here](#), to the [Android developers site](#) to install Android Studio. This page will automatically detect your operating system.

Accept the terms and conditions to start the download. Double-click the downloaded file and follow all the prompts. Drag the Android Studio icon into your Applications folder.

Setup Wizard

The setup wizard will setup Android Studio for you.

Setup Wizard – Welcome

Android Studio

Welcome! This wizard will set up your development environment for Android Studio.
Additionally, the wizard will help port existing Android apps into Android Studio
or create a new Android application project.

Finish

You can go ahead and choose **Standard Setup** and accept all the licenses.

Install Finished!

When you are finished, you will see this window:

If you're installing a recent version of Android Studio (from around April/May/June 2015) on a Mac, a standard installation might fail with a bunch of errors. If that happens, try doing a "Custom Setup" instead. Just keep clicking "Next" through all of the custom options (there's nothing you actually need to change) and let it install.
